

Your linux account has been setup. Please refer to userid.xlsx for your login id. The password will be sent to you separately.

- 1) Refer to "cadcam ip v1.3.xlsx" for the machine ip address. You can only use the ip address, i.e. 10.192.4.70. Do not use the name, i.x. "lbx17.cadcam.nus.edu.sg"
- 2) If you are on campus, you can access the ip address directly through mobaxterm (Download this software). If you are off campus, you will need to launch vpn before accessing the ip address.
- 3) Refer to password.pdf on how to change your password.
- 4) Make sure you can successfully login before our scheduled workshop next saturday. The workshop will be conducted online.

Account password

dubaiB5naqwsx1!

The account password is shown above.

- 1) After login, please change your password.
 - 2) Check whether you can access the folder /app11/gpdk045_v_6_0/
- If you have difficulty login or accessing the folder, let me know.

Best regards,
CH

I will conduct workshop this coming Saturday, i.e. 24 Jan 2026, from 1pm to 5pm. It will be much shorter. The longer time is to cater for resolving any tools usage issue that you might encounter. The workshop will cover schematic creation, simulation, corner simulation, opamp stability analysis and switch-cap circuit simulation. Attendance is not compulsory especially if you are an expert Cadence user.

Appreciate if you can login to your account before joining. I would not be able to resolve any account issue myself. If you encounter account related issue, I would try to resolve it with system admin before Saturday.

- Transient for switch cap takes a long time

- periodic steady state in cadence is good for switch cap
- it only use one switching period to simulate
